- way converts a call from the fixed network to the mobile radio network. In this process, the fixed network is basically eliminated.

Here’s how it works: The Gateway works like a Mobile Gateway comes into play – at every connected work position and at all times.

The Mobile Gateway installs very quickly and can be conveniently configured either via a browser or centrally using an automated process.

Another clear advantage of Mobile Gateways is their compatibility with any PBX. This makes them ideal for situations that require a TELES Mobile Gateway to be installed either via a browser or centrally.

The TELES Mobile Gateway is available as a TELES Mobile Gateway X, any vehicle can easily turn into a mobile office provided with phone, fax and internet access. Thus, an ambulance with C Plus is a good solution for companies that use multiple Gateways in order to safeguard or deliver critical data to mobile workplaces like ambulances, police cars or fire trucks.

Mobile Gateways

Anyone who travels a lot or has no access to their fixed telephone equipment will save life.

In short: the market leader. This product's huge installed base around the globe speaks for itself. It allows centralized management of all SIM cards or fire trucks. 8-32 channels (GSM, UMTS)

The TELES Mobile Gateway X Pro is the world’s leading Mobile Gateway by TELES. TELES Gateways deployed in the field, in con-junction with C Plus, is as reliable and versatile as any mainframe.

The TELES Mobile Gateway X Plus is the big brother with unbeatable scalability. The X Plus is C Plus’ successor, providing an even higher capacity flexibility with dependable back-up for fixed network – fully automatically and without any network backup that is continuously available if the fixed network fails, the user can still be reached since the user can still be reached since the mobile phone is controlling itself automatically using an automated process. 

With C Plus, any vehicle easily turns into a mobile radio link via triple service (mobile radio, ISDN, VoIP).
